

AAPEX WEALTH MANAGEMENT

ARE YOU MAKING THE MOST OF YOUR TAX EFFICIENCIES?

Lets talk facts.

According to recent research conducted, (of a sample of UAE residents), 63% hope to retire before the age of 60, but of that percentage, 45% admit to not having started saving for retirement. Overall, the research suggests there may be a gap in realistic perceptions, versus the reality of how a 'retirement of dreams' looks like.

At Aapex Wealth we help clients who are residing across the UAE, make decisions to secure a better future. We enjoy being part of an individual's retirement vision, whatever that might look like.

We can help shape what it looks like, and how best it can be achieved.

YOUR retirement of dreams is achievable!

If you are currently residing in any UAE Emirate, and are enjoying the benefit of not paying any tax, we can help you to make the most of that saving.

"It is concerning to witness an increasing number of clients choosing to neglect savings for their future and family, whilst paying minimal or no tax. It is crucial to take steps towards financial responsibility, as even small efforts can yield significant results. Any effort towards paying taxes and saving is better than none, so it really is essential to prioritise and plan for future financial security".

Stacey Wareing

Director, Aapex Wealth

It is possible to still comfortably enjoy life, not have to make large sacrifices and build the retirement you hope for.

Contact the team today if you're not on the right track to a brighter retirement.
